

Trend Micro™ Damage Cleanup Server

MANAGEMENT TOOL

- Web-based management tool allows administrators to deploy cleanup templates from a centralized console for consistent deployment to multiple clients
- Installs on a Microsoft™ Windows™ server in minutes and is accessible from any machine running a Microsoft browser.

TROJAN CLEANING

- Delivers an advanced scan engine to search for and eliminate specific Trojan viruses that traditional scan engines may not have the ability to detect
- Helps repair damaged registries, remove infected files from memory, and eliminate Trojan virus remnants from the client through targeted cleanup templates. These templates are designed to reduce human intervention, inconsistent cleanup, and manual deployment

AGENT-LESS CLIENT ARCHITECTURE

- Agent-less architecture allows most clients (that support Microsoft Windows) to communicate with Damage Cleanup Server regardless of what antivirus solution they have installed for easy integration in most network environments

FLEXIBLE DEPLOYMENT

- Supports manual or scheduled downloads of cleanup templates for network bandwidth management and targeted deployment

DETAILED LOGGING AND REPORTING INFORMATION

- Provides detailed log information on specific machines (by IP Address) cleaned to help identify which systems still pose a threat and may require manual cleanup
- Reports the type of Trojan virus identified, the time the cleaning action was executed, and what specific actions were taken on the system so IT administrators can assess their current network protection strategy and adjust where necessary

THE ADVANTAGES OF TREND MICRO™

- **Global Innovation:** Trend Micro™ has been a pioneer in the antivirus software market since 1988, developing innovative strategies to protect information as new computing standards are adopted around the world
- **Server Market Leadership:** Trend Micro is the global leader in server-based antivirus software with a market share of more than 60% at the Internet Gateway (IDC™ bulletin, 2001)
- **Flexible Best-of-Breed Technologies:** Trend Micro antivirus products and services are designed to integrate seamlessly with leading firewalls, intrusion detection systems, and other best-of-breed solutions for the complete enterprise strategy
- **Service and Support:** Trend Micro products and services are backed by TrendLabs, a leading center for antivirus research and support. TrendLabs monitors potential security threats worldwide and develops the means to identify, detect, and eliminate new viruses

TrendLabs™

24X7 ANTIVIRUS SUPPORT

Trend Micro products are backed by timely, high quality service from TrendLabs, a global network of five regional antivirus research and support centers with an ISO 9002-certified headquarters. A team of more than 250 engineers and antivirus specialists operate around the clock to monitor virus activity, develop information on new threats, and deliver prompt, effective strategies.

For more information about Trend Micro service and support, contact TrendLabs at <http://www.trendmicro.com/trendlabs>.

SYSTEM REQUIREMENTS

HARDWARE Server

- Intel™ Pentium™ III Processor 450MHz or higher
- 256MB RAM
- 500MB disc space for server program

SOFTWARE Server

- Microsoft™ Windows™ 2000 Server, Advanced Server, NT 4.0 SP6 and above, IIS 4.0 or higher

CLIENT

- Microsoft Windows: Windows 95 and 98, latest editions, Windows Millennium, Windows NT™ 4.0 SP6 and above, Workstation and Server, Windows 2000 Professional, Server, Advanced Server, Windows XP™

Browser:

- Microsoft Internet Explorer 5.0 or higher
